 A PRIVATE CANADIAN COMPANY

May 8, 2013

Reference: Training Partnership with Northern College of Applied Arts and Technology

To Whom It May Concern,

Per our discussions, Custom Concrete has recently entered into a long term partnership with a local mine. As a result we will initially require 8-10 AZ Truck Drivers and 12-14 Heavy Equipment Operators (with Rock Trucking being one of the pieces of equipment). Once we are fully operational, we will be running a 24/7 operation with upwards of 18 trucks, thus we will require up to 36 AZ Truck Drivers to fulfill our agreement.

Over the last year Custom Concrete has hired several Northern College graduates of the Heavy Equipment Operator and Commercial Driving Programs and we have been extremely pleased with the quality of training and the skill level of the individuals hired. For these reasons, it is our hope that Northern College will become our partner in the training to supply the workforce we require.

Certainly this partnership is an opportunity for individuals in the area to gain meaningful employment. It is such partnerships that contribute to the social and economic development of the region, and we are proud to be able to partner with Northern College.

Having an AZ License or having a Heavy Equipment Operator ticket for a loader, excavator, grader, backhoe, dozer or Rock Truck is necessary in order to obtain employment with our Company.

I look forward to a positive response and a long lasting partnership with Northern College.

Sincerely,

Jeremy Pietila, P. Eng.
Operations Manager
